Modern Masonry Rainscreen Systems

Provider:	Telling Architectural Systems
AIA Provider Number:	40107285
AIA Course Number:	CES081418v1
Course EID:	40107285 – CES81418v1
Length:	1.0 Hours = 1 LU Hours

Description:

This session will discuss modern masonry rainscreen systems and the options available to architects. The topics will include the history of rainscreens, modern vs contemporary examples, evolution of the product, it's benefits as it relates to the owner / client and design options.

Learning Objectives:

- Course will instruct the architect on the latest technologies on masonry rainscreen assemblies.
 - Understanding the critical differences between modern rainscreen assemblies and conventional masonry systems.
 - How to maximize the benefits of rainscreen assemblies to owner / client including weight reductions, thermal performance, and water management facilities.
 - Understanding the design options with rainscreen brick, terracotta and stone veneers with corners, openings, returns and other aspects of the exterior.
-
